

A Study of Revolutionary Experiences of LGBT and Non-Gay NDEs

The following is a preliminary analysis of the survey statistics from 34 NDErs from Dr. Liz Dale's and Kevin Williams' study as of July 2019. The current sample is small; but in the future, we anticipate having more surveyees in each group of NDErs. Once there are more surveyees, we will be able to report more accurately on our preliminary findings and more conclusive results can be gathered. As in any research, the larger the sample, the more accurate it is.

From **Question #01**, there were 14 LGBT NDErs and 20 Non-Gay NDErs who responded to our survey.

From **Question #02**: "Were there any changes in your values, attitudes, beliefs since your NDE other than religious, spiritual or afterlife beliefs?" more (+18.6%) Non-Gay NDErs responded "Yes" and more (+14.2%) Non-Gay NDErs responded "No". Does this suggest LGBT NDErs are more likely to not have any such changes?

From **Question #03**: "Were there any changes in your personality since your NDE?" slightly more (+12.4%) Non-Gay NDErs responded "Yes" and no (0.0%) LGBT NDErs responding "No". Does this suggest changes in personality occurs more with Non-Gay NDErs?

From **Question #04**: "Were there any changes in your outlook about life since your NDE?" more (+12.4%) Non-Gay NDErs responded "Yes" and no (0.0%) LGBT NDErs responded "No". Does this suggest changes in outlook about life occurs more with Non-Gay NDErs?

From **Question #05**: "Were there any changes in your religious or spiritual beliefs since your NDE?" slightly more (+3.8%) Non-Gay NDErs responded "Yes" and significantly more (+71.4%) Non-Gay NDErs responded "No". Does this suggest having such changes occur more with LGBT NDErs?

From **Question #06**: "Were there any changes in your relationships, spouse, partner, friends since your NDE?" much more (+33.4%) Non-Gay NDErs responded "Yes" and much more (+42.8%) LGBT NDErs responded "No". Does this suggest LGBT NDErs have more stable relationships than Non-Gay NDErs?

From **Question #07**: "Were there any distressing aftereffects from your NDE?" more (+13.0%) Non-Gay NDErs responded "Yes" and more (+27.2%) Non-Gays responded "No". Does this suggest distressing aftereffects from NDEs are minimal?

From **Question #08**: "Were there any changes in your dreams or dream content since your NDE?" slightly more (+10.0%) Non-Gay NDErs responded "Yes" and more (+28.6%) Non-Gay NDErs responded "No". Does this suggest having such changes are not much of a factor in affecting Non-Gay and LGBT dreams or dream content?

From **Question #09**: "Did you have any problems being around electromagnetic fields since your NDE?" there were slightly more (+6.6%) Non-Gay NDErs responding "Yes" and more (+26.4%) Non-Gay NDErs responding "No". Does this suggest having such problems are less of a factor?

From **Question #10**: "Were there any changes in sensitivity to light since your NDE?" more (+23.8%) Non-Gay NDErs responded "Yes" and slightly more (7.6%) Non-Gay NDErs responded "No". Does this suggest more Non-Gay NDErs are susceptible to changes?

From **Question #11**: "Were there any psychological challenges since your NDE?" more (+15.4%) Non-Gay NDErs responded "Yes" and more (+25.0%) Non-Gay NDErs responded "No". Does this suggest psychological aftereffects were not much of a factor?

From **Question #12**: "Was there any difficulty reintegrating after your NDE?" slightly more (7.6%) Non-Gay NDErs responded "Yes" and significantly more (+50.0%) Non-Gay NDErs responded "No". Does this suggest LGBT NDErs have more difficulty reintegrating their NDEs?

From **Question #13**: "Were there any changes in your jobs, school, interests, or hobbies?" slightly more (+13.4%) Non-Gay NDErs responded "Yes" and significantly more (+50.0%) Non-Gay NDErs responded "No". Does this suggest Non-Gay NDErs have more job/school stability?

From **Question #14**: "Did your I.Q. change after your NDE?" more (+20.5%) LGBT NDErs responded "Yes" and more (+20.5%) Non-Gay NDErs responded "No". Does this suggest LGBT NDErs have higher I.Q.s changes?

From **Question #15**: "Did you have any paranormal experiences (e.g. apparitions) since your NDE?" more (23.8%) Non-Gay NDErs responded "Yes" and slightly more (+7.6%) Non-Gay NDErs responded "No". Does this suggest LGBT NDErs are less susceptible to paranormal phenomena?

From **Question #16**: "Were there any changes in your feelings of compassion, caring, loving since your NDE?" more (+26.6%) Non-Gay NDErs responded "Yes" and significantly more (+50.0%) LGBT NDErs responded "No". Does this suggest LGBT NDErs are more compassionate, caring and loving after NDEs?
